

REMARKS

Claims 1 – 8, 12 – 27 and 29 – 47 were pending in the application. Claims 2, 3, 7, 21 – 26 and 29 – 34 have been cancelled. Claims 1, 4 and 27 have been amended. Claims 48 – 51 have been added. Claims 1, 4 – 6, 8, 12 – 20, 27 and 35 – 51 accordingly remain pending in the application.

A marked-up copy of the amended claims is provided herewith illustrating the changes.

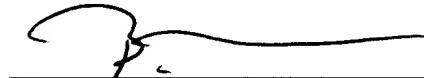

Claims 35 – 46 have been allowed.

The Examiner indicated Claims 2, 4 – 7 and 47 would be allowable if rewritten in independent form. Claim 1 has accordingly been amended to include the features of Claim 2, and is thus believed to be in condition for allowance. Claim 27 has similarly been amended to include the features of Claim 47. In addition, added Claim 48 includes the features of Claim 7, rewritten in independent form. Dependent Claims 49 – 51 are similar to Claims 13, 15 and 19, respectively.

In light of the foregoing amendments and remarks, Applicants submit that all pending claims are now in condition for allowance, and an early notice to that effect is earnestly solicited. If a phone interview would speed allowance of any pending claims, such is requested at the Examiner's convenience.

The Commissioner is authorized to charge any fees which may be required, or credit any overpayment, to Conley, Rose & Tayon, P.C. Deposit Account No. 501505\5181-71100\BNK.

Respectfully submitted,

B. Noël Kivlin

Attachment A: Marked-Up Copy of Amended Claims

1. Rack mountable display apparatus configured to be used with an electronic equipment rack, said apparatus comprising a display and a support mechanism configured to support the display, the display being moveable between a substantially vertical orientation extending back into the rack when in a retracted storage position within the electronic equipment rack and a deployed position external to the electronic equipment rack, wherein the support mechanism comprises a slide, the display being slideable between the storage position with the display stored within the electronic equipment rack and the deployed position with the display deployed externally to the electronic equipment rack.
4. The rack mountable display apparatus of claim [2] 1, wherein the support mechanism comprises an orientation mechanism operable to orient the display in the deployed position to facilitate reading of the display.
27. A method of providing maintenance information to personnel for maintaining electronic equipment mounted in a rack, the method comprising providing a support mechanism for a display, the display being moveable between a substantially vertical orientation extending back into the rack when in a retracted storage position within the rack and a deployed position external to the rack and providing maintenance information on a plurality of sheets of sheet material to the support personnel when the display is located in the deployed position.
